Team Lead - Site Reliability Engineer (SRE)

Pensum 100%

Arbeitsort Rapperswil, St. Gallen, CH

bexio is the leading provider of web-based business software for small businesses. Currently, bexio has over 40,000 customers and more than 100 employees.

The centerpiece of bexio is the team. We are interested in people – we are not only a workgroup but a community. Your opinion counts, your ideas are listened to and implemented: we want you to be proactive and become part of our vision - to make small businesses more successful.

Team Lead - Site Reliability Engineer (SRE)

What awaits you at bexio:

bexio is in an exciting phase as we are modernising our SaaS platform, moving towards GitOps and Infrastructure as Code based on Google Cloud Platform (GCP). In this context we are seeking for a skilled Site Reliability Engineer (SRE) to further strengthen and lead our growing SRE team. We have a strong alignment for this modernisation process, which is seen as vital to our ability to further scale and innovate. If you are looking for a dynamic, startup-like environment working on great challenges with great people, then this is the right place for you.

As a senior member and leader of our SRE team you'll have a great deal of input into technical discussions and decisions along our strategy to scale. In addition, you get the chance to lead and mentor a growing team that combines software and systems engineering to build and run large scale, massively distributed, fault-tolerant systems deployed to Google Cloud Platform (GCP).

What we are looking for:

- You have min. 2 years of experience as a Senior SRE
- You've got a profound hands-on knowledge of GCP (Google Cloud Platform)
- You have a good appreciation of IaC (Infrastructure as Code), CI/CD and modern tooling such as Terraform, Helm, Jenkins
- You have experience with monitoring and tracing tools - e.g. Prometheus, Honeycomb, Grafana, ELK
- You're able to script (or code) ideally with Bash and Python
- You're familiar with DevOps environments / Containerization (Docker, Kubernetes)
- You have excellent communication skills; collaborative and personable - happy to help take a lead on projects and provide mentoring
- You have superior interpersonal communication skills in English (German skills are desirable but not required)

Our Benefits:

- Open and honest working atmosphere
- Much freedom for personal development
- Work smart - choose the ideal environment for your tasks
- No matter if night owl or early bird - we offer flexible working hours. Flat hierarchies enabling fast and short decision paths
- Expect many employee events, team lunches and friday chillouts
- Modern infrastructure and high-end equipment

What else you can expect from us:

Our team of over 100 employees works hard every day to achieve our vision of making small businesses more successful. When you join our team you become part of our culture, which is grounded in a strong commitment to our core values, our talented people and an unwavering focus on our customers. We encourage our people to share ideas, make suggestions and provide feedback.

This is a full-time, permanent position in beautiful Rapperswil SG, Switzerland. Hybrid work is possible.

Sounds good? Apply now and we will contact you shortly.
